

Scope:

This policy covers all PC's that owned and connect to the CCSU network.

Purpose:

Antivirus software helps protect computers from malicious code. Requiring antivirus software on certain operating systems will improve the overall security of CCSU's network.

Policy:

Use of antivirus software - All CCSU owned PC's may be required to use antivirus software. If a PC is required to use antivirus software, that software must be configured to accept updates.

Failure to use appropriately configured antivirus software may result in loss of access to the CCSU network.

Exceptions:

Exceptions to this policy will be handled and documented by the Change Management Committee.

Review:

This policy will be maintained and reviewed.

Emergencies:

In emergency cases, actions may be taken by IT. These actions may include rendering systems inaccessible.

Appendix:

Personal Computers (PC)

PC Window or Mac – Any personal computer running a Windows operating system is required to have an antivirus program running. Any personal computer running a Macintosh operating system is required to have an antivirus program running.
