

# Gaming, Streaming, Wired Device Registration in Residence Halls

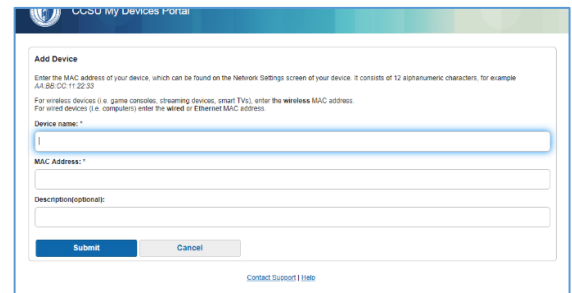

**Gaming devices** (Xbox, PlayStation, etc.) and **streaming devices** (SmartTV, AppleTV, Amazon FireStick or FireTV, Roku, etc.) must be registered in the CCSU My Devices Portal to connect to the **ccsu-public** wireless network. If you requested to have the network data drop (wired internet) activated, you must also register the device you are connecting. To register a device:

1. Using a computer or phone/tablet connected to the internet already, open your web browser and navigate to <https://mydevices.ccsu.edu>.
2. Enter your **CCSU Office 365 email address (@my.ccsu.edu)** and password.
3. At the Manage Devices screen, click on the **Add** button.

4. Complete the Add Device screen:

- a. **Device Name:** enter a descriptive name for the device that includes your name and the type of device. For example, “Jane Doe Xbox”, “John Smith FireStick”, or “Mark Rivera PC” (*Note: do not include punctuation such as a periods or apostrophes*).
- b. **Mac Address:** For **wireless gaming/streaming devices connecting to ccsu-public**, enter the **wireless MAC or wi-fi address** of your device. For **wired devices/computers**, enter the **physical/wired MAC address**. This is typically found under the network information section of your device.
- c. **Description:** this is an optional field that can be used if you would like to further describe your device.

5. Click on the **Submit** button. Repeat steps 4 and 5 for each device you wish to register, up to 12.
6. **Wireless gaming/streaming devices** – connect devices to the **ccsu-public** wireless network. You may need to power-cycle the device if you are not getting an active connection. Registered gaming devices are only permitted to connect to ccsu-public while in CCSU residence halls, or in designated gaming/lounge areas. Please use the ccsu-blunet wireless for non-gaming devices across campus.  
**Wired devices** – after receiving confirmation that the network data drop is active, plug your device in to the wired network (you must provide your own ethernet/network cable). You may need to power-cycle the device if you are not getting an active connection. (*Note, for wireless access on a computer, connect to the ccsu-blunet wireless network, sign in with your CCSU email address and password and accept/trust the certificate; you do not need to register your laptop if connecting wirelessly*).

**Need Help?** Contact the **IT Help Desk** at **860-832-1720** or [techsupport@ccsu.edu](mailto:techsupport@ccsu.edu).
