

Central to Leading the Building Process.

Central's BS in Construction Management prepares students for management and supervisory professions in the challenging world of construction. The curriculum focuses on field operations, estimating, and project management processes as they relate to building and heavy/highway construction projects. Analytically-based mathematics and science courses along with construction management and business courses round out the program.

Students will learn and utilize the latest computer applications throughout the academic program. Laboratory experiences, field trips, and student club activities are an integral part of the student's academic experience.

Program Features

- Provides fundamental applied knowledge of the concepts of estimating, scheduling, superintendency and project management
- Students will be able to apply computer software to various construction management processes
- Includes a required internship and opportunities for developing practical knowledge and experience
- Supported by local industry and professional organizations
- Excellent career opportunities for starting positions and advancement
- Internship opportunities
- Financial aid and scholarships available
- Free on-campus child care available

Central's Bachelor of Science in Construction Management program is accredited by the American Council for Construction Education (ACCE).

CONSTRUCTION MANAGEMENT

Bachelor of Science

Career Preparation

Central Construction Management graduates can expect to be qualified for a wide variety of job opportunities, including, but not limited to:

- Project Manager
- Project Engineer
- Superintendent
- Estimator
- General/Specialty Contractor

“Working on the CTFastrak bus-way project has been a truly great learning experience. I felt I was well prepared for the job by my construction management courses, and I'm confident in my ability to manage all aspects of construction.”

- Stephen Dayton ' 23
About his internship with CTFastrak

DID YOU KNOW?
The median annual wage for construction managers was \$98k in May 2021.
Employment of construction managers is projected to grow 8 % from 2021 to 2031, faster than the average for all occupations.

Clubs

Central's **Construction Management Club** promotes the overall study of construction. The club facilitates the exchange of information and ideas about construction, familiarizes the campus community with the professional character of the construction industry, expands the student member's knowledge of the construction industry and practices, and promotes communication between student members and people within the construction industry.
